Kaiser Steel Corporation
Sunnyside, Utah

Re: Proposed crusher site for Tar Sands Process.

Dear Lloyd:

As per our telephone conversation of June 26, 1981, I am submitting this letter as formal request for authorization to install a temporary portable crusher on Kaiser Steel Property at Sunnyside Canyon.

The land requirements will be approximately 1/2 acre and the duration of use, 30-60 days.

I have spoken to Rodger Kohlman about this project and he informed me that there would be a cost factor for the use of the property. We do not object to paying for the space and in your response to this request would you please stipulate those costs.

I am sure there will be a need for verification of insurance before we occupy the land. Please include those requirements so that we can respond.

I have the contract for this phase of the Tar Sands in place and enclosed is a copy of the letter to proceed from Great National Corporation. We will mobilize on the project as quickly as we can clear the permit. The Utah State Division of Oil, Gas and Mining has assured me that we could have the permit within 15 days from the time that we get all the documents to them. We should have all requirements met by Monday, June 29, 1981.

Your immediate response to this request would be greatly appreciated so we can keep our files current and assure our time schedule.

We thank you for your past cooperation and await your reply.

Sincerely,

Thomas R. Kendrick, President
